

G Performer 8.0 *Ultimate solution*

**NEW
PRODUCT**

Maintain
a high
health
status

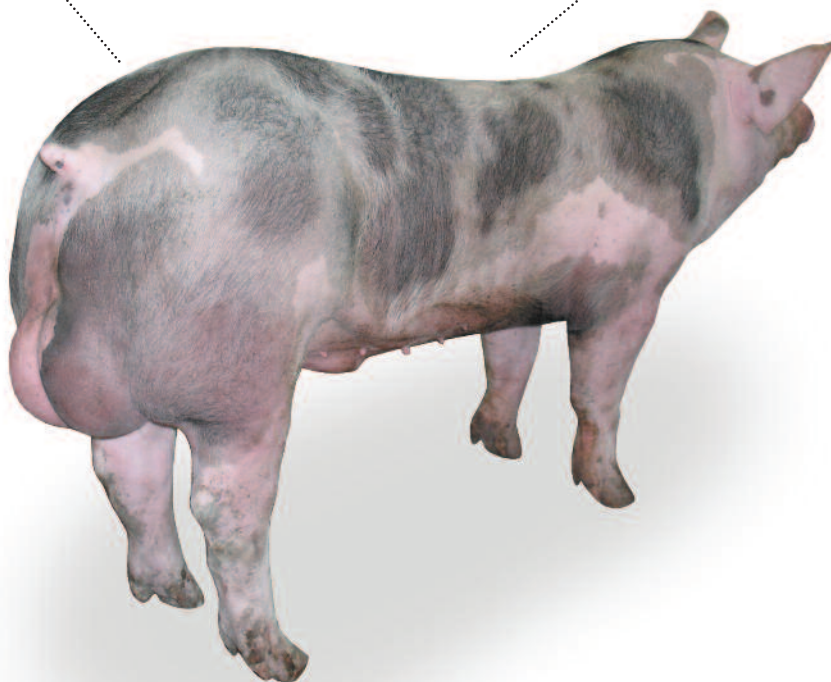

World leader in biosecurity for more than 25 years, Genetiporc is producing high health terminal boars in order to protect its customers from primary disease introduction and their associated economic impacts, reducing mortality cost and lost productivity.

The leader of efficiency

The G Performer 8.0 allows for maximum feed conversion reduction to reduce feeding costs while delivering exceptional lean yield at the processing plant.

Improve producer's income at the slaughterhouse

The high growth and unequalled carcass yield of the G Performer 8.0 produces pigs that are highly adapted for the processor's needs. Its exceptional lean yield combined with the highest loin eye in the industry represents a winning package for both the slaughterhouse and the producer by delivering maximum lean carcass and loin eye.
